

Livestock Record Sheet

Track major events for each animal: births, deaths, treatments, moves, and key notes in one spot.

How to use: For each event, fill in the details for each animal. Add a new row for every birth, treatment, or notable happening.

DATE	ANIMAL NAME/ID	SPECIES/BREED	EVENT (BIRTH, DEATH, TREATMENT, MOVE)	DETAILS/NOTES

What goes in each column

- 1. When did the event happen? (Exact date or best estimate)
- 2. Which animal is this about? (Name, tag, or description)
- 3. What kind is it? (Chicken, rabbit, goat, etc.)
- 4. What happened? (Birth, vaccine, injury, moved, etc.)
- 5. Any special notes? (Treatments given, outcome, unique info)

If your rooster "Red" gets treated for a limp on April 3rd, record: 4/3, Red, chicken, treatment, "Treated for limp; walking better next day."
