

Garden Planting Log

Record when, where, and what was planted or transplanted in your garden rows or beds.

How to use: Every time you plant or transplant, fill in a row. Note later big events, such as first harvest, fertilizer, or hard frost, on new lines.

DATE	GARDEN AREA/ROW	CROP/VARIETY	EVENT (PLANTED, TRANSPLANTED, FERTILIZED, ETC.)	NOTES

What goes in each column

- 1. When did you plant or do the event?
- 2. Which row, bed, or spot is this?
- 3. What crop and variety is it?
- 4. What happened? (Planted, transplanted, etc.)
- 5. Any extra notes? (Weather, issues, results)

If you transplanted 'Roma' tomatoes into Row B on May 18, write: 5/18, Row B, Roma tomato, transplanted, "Planted after last frost. All plants healthy."
