

Capture all needed supplies and expenses in one spot for the whole household to use and review.

DATE	ITEM	TYPE (FEED, SEED, TOOL, ETC.)	LOCATION (BARN, PANTRY, ETC.)	NOTICED BY	ESTIMATED COST/QUANTITY	SPENT (AFTER PURCHASE)	CHECKED OFF?

What goes in each column

- 1. What is running low or needed soon?
- 2. Where is it kept?
- 3. Who first noticed it was needed?
- 4. How much does it cost or what quantity?
- 5. Was it purchased and checked off?

Example: The Petersons noticed they were low on chicken feed and added it to the log under 'Item.' Dad wrote 'barn' for location, the date, and estimated cost. After buying it in town, they wrote the actual amount spent and checked the box—no more 'who was supposed to get feed?' confusion.
