

Command Center Review Checklist

Quickly audit your current binder or digital setup to keep only relevant and useful sheets, removing what you don't need. Ensures your system always fits your homestead.

How to use: Print this checklist or use as a guide. List each sheet in your Command Center, mark if you use it, and note sheets to archive or replace. Repeat every season or as things change.

SHEET/LOG NAME	CURRENTLY USING? (Y/N)	KEEP, ARCHIVE, OR REMOVE?	REASON/NOTES

What goes in each column

- List every sheet currently in your binder or spreadsheet.
- Mark whether you actually use it regularly.
- Decide if you should keep it active, archive it for later, or remove it entirely.
- Note why (e.g., no longer raising rabbits, switching to new type of log).

For instance, during a spring review you list 'Chicken Egg Log', realize you stopped using it over winter, and mark that as 'Archive' with a note 'No laying hens until summer.'
