

To record and organize every recurring chore on your homestead, across animals, gardens, and property maintenance.

How to use: List each recurring chore with its frequency, main area, who is responsible, and any key supplies needed. Use this as your family's reference and update it as your homestead grows.

What goes in each column

1. Describe the task clearly enough for anyone to understand.

- 2. How often must this be done?
- 3. Where or for what group is this done?
- 4. Who usually does (or can do) this job?
- 5. What tools or items must be on hand to complete the task?

For example, if one row reads: 'Collect eggs | Daily | Chickens | Any adult or responsible child | Egg basket', anyone in the family could pick up the checklist and know what to do.
