

To help you sort chores from your brain-dump into daily, weekly, monthly, or seasonal groups for clearer planning.

How to use: After listing all chores from memory, use this worksheet to place each task under the proper frequency. This helps you see workload at a glance and prevents overloading any one day.

What goes in each column

1. What recurring homestead job is this?
2. Which area (animals/garden/maintenance)?
3. How often do you need to do it?

Seeing everything in columns helps spot when too many big jobs are all due on the same weekend, so you can adjust smarter.
