

Command Center Location Planner

Helps you assess and choose the best spot for your homestead’s central command.

How to use: Walk your key living and working areas and fill out the table before picking your Command Center location.

What goes in each column

- 1. List spots (e.g. kitchen counter, mudroom shelf, barn wall)
- 2. How well can this spot be seen?
- 3. Who commonly uses this path—adults, kids, both?
- 4. Is it simple to stop and check/update?
- 5. Will junk pile up here?
- 6. List any practical issues (lighting, space, animals, etc.)

If you're weighing the kitchen counter versus the mudroom bench, use this worksheet to compare—Sarah in the real-life example filled this for three spots before picking her kitchen shelf.

POTENTIAL LOCATION	HOW VISIBLE IS IT? (HIGH/MEDIUM/LOW)	WHO PASSES BY DAILY?	EASE OF ACCESS (EASY/MEDIUM/HARD)	RISK OF CLUTTER/OBSTRUCTION	NOTES/CONCERNS
