

Homestead Supplies Inventory

Track critical homestead supplies, their quantities, sources, and when to reorder—so you never run out again.

How to use: Use this worksheet for your top 10-20 supplies. Check and update quantities weekly. Mark anything low with an asterisk and note reorder dates.

What goes in each column

- 1. What's the supply item (feed, hay, bedding, etc.)?
- 2. How much do you have now? (units, bags, lbs, etc.)
- 3. Where do you usually buy this supply?
- 4. Where do you store this supply on your property?
- 5. When did you last check the quantity?
- 6. When should you order or buy this again?
- 7. Anything unusual? (price hike, running low faster, etc.)

For example, if your main concern is chicken feed, you'd fill in the item, amount left (in bags or pounds), usual feed store, the bin where it's kept, today's date, estimate your refill date, and note if usage spiked this month.

SUPPLY NAME	CURRENT AMOUNT/UNITS	USUAL SUPPLIER	LOCATION ON HOMESTEAD	DATE LAST CHECKED	REORDER DATE/REMINDER	NOTES
