

Livestock Treatment Log

Use this to track all main health treatments, births, deaths, or other major herd/flock events for one animal group. One log sheet per group makes reference simple.

How to use: Print a copy for each animal group. Write the group name at the top. Fill in an entry whenever there is a new treatment, health event, arrival, or loss.

What goes in each column

- 1. What happened?
- 2. Which animals?
- 3. Any important notes for next time?

Amy recorded '4/3/24', Event: 'Worming', Animals: 'Clover, Poppy', Notes: 'Ivermectin, full dose, mild cough.'

DATE	EVENT (E.G., TREATMENT, BIRTH, DEATH)	ANIMALS INVOLVED (NAMES, TAGS, OR NUMBER)	NOTES (PRODUCT/MEDICINE, DOSE, REASON, OUTCOME)
